RESUME SUMMARY

Skilled **MERN Stack Developer** with **8 months of hands-on internship experience** in developing full-stack web applications using **React.js, Node.js, Express.js, and MongoDB**. Experienced in **backend API development, frontend integration, and building responsive user interfaces**. Familiar with **REST APIs, database operations, and clean coding practices**. Capable of working on real-world projects with strong problem-solving and development skills.

WORK EXPERIENCE

MERN stack Intern - TechFusion Computer Training Institute LLP | SEPT 2025 - APRIL 2026

- Hands-on experience in **developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js**.
- Skilled in **backend API development, REST API integration, frontend integration, and responsive UI development**.
- Experience in building **authentication systems, CRUD operations, and reusable React components using HTML5, CSS3, Bootstrap, and JavaScript**.
- Worked on **real-world projects including task management systems and movie ticket booking applications** with **responsive and user-friendly interfaces**.

PROJECTS

Project: BookMyShow Clone – Movie Ticket Booking System (MongoDB, Express.js, React.js, Node.js, HTML5, CSS3, JavaScript, Bootstrap)

- Developed a **full-stack movie ticket booking platform** inspired by BookMyShow using the MERN stack architecture.
- **Built both frontend and backend modules from scratch**, including user **authentication, movie listings, show details, and seat booking management**.
- **Designed and integrated RESTful APIs** for handling user accounts, movie data, booking operations, and ticket management.
- Implemented **dynamic seat selection and booking flow with real-time data handling** and responsive UI updates.
- Structured **MongoDB collections and backend logic to manage movie information, booking records, and user activities efficiently**.
- Created **reusable React components** and implemented **frontend routing for smooth navigation across multiple pages**.
- Managed **API integration between React frontend and Node.js/Express backend for seamless data communication**.
- **Developed responsive and user-friendly interfaces** optimized for both desktop and mobile devices.
- Applied **component-based architecture, state management, and modular backend structure** to improve scalability and maintainability of the application.

Project: TaskTracker – Task Management System (React.js, Redux, React Router, HTML5, CSS3, JavaScript, Bootstrap)

- Developed a **task management application with secure login and signup functionality** for admins and employees.
- **Implemented role-based access** where **admins can assign tasks, monitor task status, and review employee updates efficiently.**
- Designed features for **task creation, task assignment, progress tracking, and employee feedback management to improve workflow organization.**
- Used **React Router** for seamless page navigation and **Redux for efficient state management across the application.**

Project: Employee Management System (React.js, HTML5, CSS3, JavaScript, Bootstrap)

- Developed a **responsive Employee Management System** using **React.js** for efficient data handling and record management.
- Implemented **functionalities to add, view, update, and delete employee records** dynamically.
- Created **reusable React components** to improve application scalability and maintain clean code structure.
- Integrated **form validation and dynamic data rendering** for smooth and secure user interactions.
- **Managed application state** efficiently using React Hooks and component-based architecture.
- Designed **responsive UI interfaces using Bootstrap** to ensure compatibility across multiple devices.
- Enhanced user experience with interactive **forms, real-time updates, and organized dashboard layouts.**

SKILLS

Frontend Technologies - HTML5, CSS3, Bootstrap, Javascript , ReactJs , Redux

Backend Technologies - ExpressJs , NodeJs , REST API's development , Frontend Integration, MVC

Database - MongoDB

Libraries and Tools - Redux, Redux Toolkit, Context API, React-Router, Axios, Mongoose, Git, GitHub

Others - Problem solving, Analytical Thinking, Team Collaboration, Time Management, Adaptability

EDUCATION

Govindrao Wanjari College of Engineering and Technology, Nagpur 2022-2025

Bachelors of Technology(IT) CGPA - 7.7

CERTIFICATES

MERN Stack Development

TechFusion Computer Training Institute LLP

SEPT 2025-APR 2026
